LEGALICITY

the right tools for the modern lawyer

Our Story

Legalicity is a Toronto-based legal tech company using today's technology to save law firms time and money. We are a family of lawyers, scientists and engineers with expertise in patent law proceedures and computational linguistics. These two fields together compel us to make patent law less about the grunt work and more about it's true purpose, invention. Legalicity is a company that invents, for inventors, by inventors.

Our Product:

NLPatent
Quantifying Innovation

NLPatent is a patent search tool commended by leading Canadian lawyers and Innovators.
0.01% uncertainty. 99.9% revolutionary.
Use the latest tech to stand out from the crowd.

LEGALICITY

the right tools for the modern lawyer

Our Story

Founded in 2015, **Legalicity** is a Toronto-based legal tech company, the first of its kind aimed to build better solutions for legal consumers.We are a family of lawyers, scientists, and engineers who hold years of expertise in **Artificial Intelligence** and intellectual property law. Our passion within these arenas propels us to challenge the current traditions of legal practice - bringing AI innovations to the routines of IP, we make **patent law** less about the grunt work and more about the fight for breakthroughs. We have the right tools for the modern lawyer, that use the **latest technology** to stand out from the crowd. We combine cutting edge legal expertise and creativity to bring you the **next generation of legal tools**. Our products use Artificial Intelligence to wipe out inefficiences from your work flow.
